Supplemental Report: Profiles of State University Health Centers

April 2010

Report No. 10-37

Introduction

This report is a companion to OPPAGA [Report No. 09-40](#), *University Students Pay \$68 Million for Health Services; Mandating Health Insurance Would Produce Benefits But Raise Uninsured Students' Cost of Attendance 5% to 7%*. This report provides detailed profiles of student health services at each of the 11 state universities. Each profile provides information on how the university distributed student health fees as well as information on the student health center, including its mission, size, number of student visits, services provided, fees charged for services, and sources of funding.

Student health fee distribution. Section 1009.24, *Florida Statutes*, authorizes state universities to establish a student health fee and caps the amount of all fees that institutions can charge students. In 2008-09, universities collected more than \$55 million in health fees from students, with most of these fees supporting the operations of their student health centers. A portion of these fees supported university counseling centers and other health-related activities on campus.¹

Overview of University Health Centers. State university health centers range from small clinics that treat minor illnesses to comprehensive medical facilities that provide a wide range of health services. Health centers vary in size from 2,400 square feet at the University of West Florida to 48,000 square feet at the University of Central Florida.² Additionally, the number of student visits to university health centers in 2008-09 ranged from 1,541 at New College of Florida to 84,406 at the University of Florida. The primary role of all university health centers is to provide high quality medical care to students.

Health center services. All university health centers offer primary care office visits, women's health office visits, health education, immunizations and vaccinations. Some health centers also provide radiology, nutrition, dental, pharmacy, lab work, sports medicine, urgent care and first responder services. The fees associated with these services vary by university.

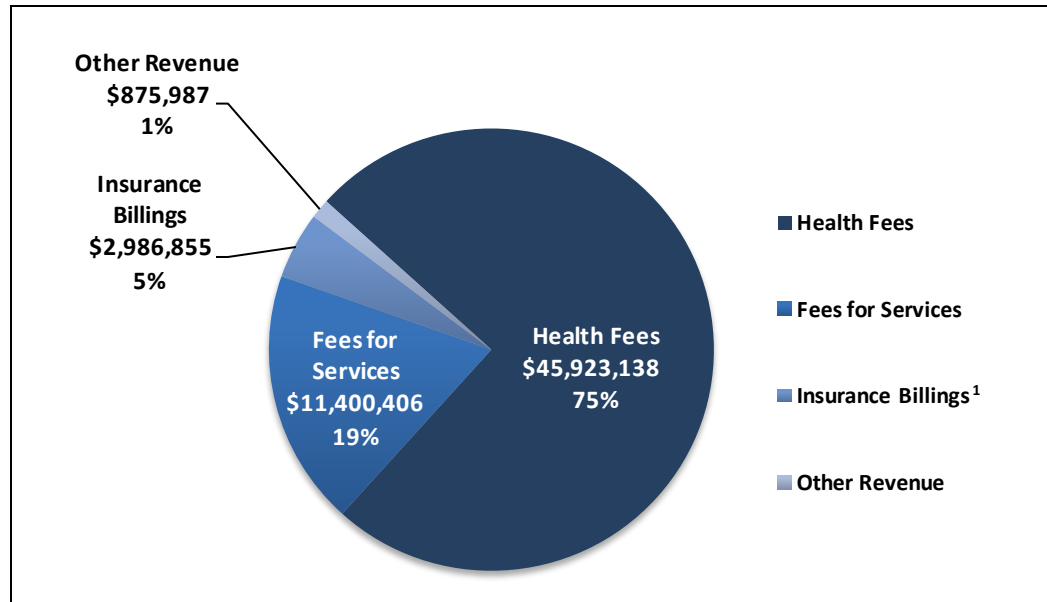

Health center funding. State university health centers are primarily supported by student health fees (\$45.9 million in 2008-09) and charges for health services (\$11.4 million in 2008-09). In addition, three university health centers (University of Central Florida, Florida State University, and University of South Florida) received revenue from billing a variety of students' health insurance plans. Florida Atlantic University, University of Florida, and University of North Florida reported billing revenue from their university-

¹ See Exhibit 3 in *University Students Pay \$68 Million for Health Services; Mandating Health Insurance Would Produce Benefits But Raise Uninsured Students' Cost of Attendance 5% to 7%*, OPPAGA [Report No. 09-40](#), December 2009, p. 5.

² The square footage includes 34,565 square feet of on-campus space and 10,000 square feet in satellite offices.

sponsored insurance plan. Exhibit 1 shows the types and amounts of revenue received by university health centers.

Exhibit 1
University Health Centers Are Primarily Supported by Student Health Fees and Charges for Services at Student Health Centers

¹ This total includes Florida Atlantic University, Florida State University, University of Central Florida, University of Florida, University of North Florida, and University of South Florida. Florida State University, University of Central Florida and University of South Florida all bill multiple types of insurance policies, while Florida Atlantic University, University of Florida, and University of North Florida just bill the university-sponsored plan.

Florida A&M University Student Health Center

Overview of Student Health Center

Mission: The Florida A&M University student health center's mission is to promote optimal health care in the student population with the emphasis on prevention of disease. The health center strives to provide quality, cost-effective medical care in a nurturing environment. In addition to comprehensive health education and outreach programs, the health center assists students in the pursuit of their academic goals consistent with the university's mission of achieving excellence with caring.

Student Health Center Information: Exhibit 2 provides information on the health center's size, number of staff (FTE), number of student visits, the number of students who visited the health center, and the number of referrals (the number of student visits that were referred to a community provider) for the 2008-09 academic year.
