an office of the Florida Legislature

Profile of Florida's Public Workforce Education Program Providers by Service Area

December 2010   Report No. 10-65

Introduction

Florida's workforce education programs help individuals attain skills needed to become or remain economically self-sufficient. These programs provide training designed to meet local and state workforce needs and help Florida compete in the global economy by building a broadly based, highly skilled, and productive workforce.

Workforce education programs include both postsecondary career education and adult education programs. Postsecondary career education programs prepare individuals for specific occupations and award various credentials upon completion. In the 2008-09 school year, Florida's school districts and colleges served approximately 187,000 students. Adult general education programs provide literacy, basic skills, and English language training to help individuals improve their job performance and/or move to higher paying jobs. Districts and colleges served approximately 320,000 students in adult education programs in the 2008-09 school year.

School districts also provide career education programs for high school students that enable students to earn industry certifications and postsecondary credit. High school students may take career education courses to earn secondary credit, or they may participate in dual enrollment opportunities with a district technical center or college to earn postsecondary credit.

School districts and colleges have local authority to decide what workforce education programs to provide in their service areas and how to organize program delivery.[1] As a result, workforce education programs vary throughout the state, as does the division of responsibility between districts and colleges.

This report is a supplement to OPPAGA Report No. 10-61, and profiles each college service area, detailing which entity (school district or college) provides workforce education programs and enrollment numbers for these programs during the 2008-09 school year. The report also includes a list of any programs that were duplicated by the college and district in the same county during that school year and a list of each entity's top five largest postsecondary career education programs.

---

[1] Each of the 28 Florida College System institutions has a service area that includes one or more school districts, with all 67 districts covered by one of the 28 service areas.

Table of Contents

Methodology

We obtained 2008-09 enrollment data from the Department of Education. The department provided aggregate secondary career education enrollment numbers. Postsecondary career education students must have completed at least 1 instructional hour in the program, and adult education students must have completed at least 12 instructional hours in the program to be included in the profile enrollment tables.

To determine if colleges and school districts were duplicating workforce education programs, we analyzed 2008-09 institutional enrollment data for postsecondary career and adult education programs. If a specific program (i.e., Cosmetology vocational certificate) was being offered by both a college and a district within the same college service area, we contacted the institutions to determine if each was offering the program within the same county. We considered programs to be duplicated only if they were being offered by both a college and district within the same county.

Summary Statistics

As shown in Exhibit 1, school districts provide most of the state's adult education (81%), adult vocational certificate (76%), and apprenticeship programs (72%). Colleges provide all degree and college credit programs and the remaining adult education, adult vocational certificate, and apprenticeship programs. A large number of high school students participate in career and technical programs for secondary credit (616,255), and some students dual enroll with a college or district technical center to earn postsecondary career education credit.

Exhibit 1
School Districts Provide Most Adult Education in Florida While Colleges Focus on Degree and Credit Programs

Program Type	2008-09 School Year			
	College Enrollment[1]	Percentage Enrolled in Colleges	School District Enrollment[1]	Percentage Enrolled in School Districts
Secondary Career Education				
Career and Technical Program – Secondary Credit	N/A	N/A	616,255	100%
Postsecondary Vocational (PSV) Certificate Dual Enrollment	N/A	N/A	4,234	100%
Postsecondary Adult Vocational Certificate (PSAV) Dual Enrollment	N/A	N/A	8,837	100%
Total	**N/A**	**N/A**	**629,326**	**100%**

Adult Education[2]				
Adult Basic Education	29,300	25%	86,518	75%
Adult High School	4,980	33%	10,126	67%
Adult High School (Co-enrolled)	1,489	2%	60,036	98%
General Educational Development	6,025	31%	13,481	69%
Adult English for Speakers of Other Languages	20,611	16%	109,781	84%
Citizenship	3,793	57%	2,841	43%
Total	**66,198**	**19%**	**282,783**	**81%**

[1] Enrollment numbers may be duplicated (a student may be enrolled in more than one program at a time).

[2] We did not include enrollment numbers for Applied Academics for Adult Education (formerly Vocational Preparatory Instruction) because it is not a standalone adult education program. To be enrolled in Applied Academics for Adult Education, a student must be enrolled in a vocational certificate program.

[3] By law, school districts cannot offer degree or college credit programs.

Source: OPPAGA analysis of Department of Education data.

School districts and colleges tend to offer different types of workforce education programs rather than providing the same training programs within a county. Among the hundreds of workforce programs offered, there were few cases in which districts and colleges offered the same career education program within a county during the 2008-09 school year. There were eight counties in which a school district and a college offered the same career education program.[2] In total, we identified 40 duplicated programs across the state, ranging from 1 in Pasco County to 16 in Miami-Dade County.

Districts and colleges were more likely to duplicate adult education programs; we identified 18 counties in which both school districts and colleges offered the same adult education programs in the 2008-09 school year.[3]

The top five largest career education programs vary by system. As shown in Exhibit 2, the Nursing associate in science degree program (leading to a Registered Nurse credential) had the highest number of students enrolled in the college system during the 2008-09 school year, while the Practical Nursing vocational certificate program (leading to a Licensed Practical Nurse credential) had the highest enrollment in the districts.

Exhibit 2
Top Five Postsecondary Career Education Programs by Student Enrollment in 2008-09

Florida College System		School Districts

---

[2] The eight counties were Broward, Escambia, Hillsborough, Indian River, Leon, Marion, Miami-Dade, and Pasco.

[3] The 18 counties were Alachua, Bay, Escambia, Flagler, Gadsden, Hardee, Hernando, Hillsborough, Indian River, Leon, Manatee, Martin, Miami-Dade, Pasco, Putnam, Santa Rosa, Sarasota, and Walton.

Florida College Service Area Profiles

The following profiles provide detailed information on the types of workforce education programs offered by school districts and Florida College System institutions, and the numbers of students enrolled in these programs during the 2008-09 school year.

The table below describes each type of workforce education program included in the profiles. Districts and colleges both provide workforce education programs, but only colleges are authorized to provide degree and college credit programs.[4]

| Program Type	Program Description
Secondary Career Education	
Career and Technical Program – Secondary Credit	Career and technical courses taken at a high school for which students earn high school credit. A series of these courses may allow a student to earn an industry certification upon graduation.
Postsecondary Vocational (PSV) Certificate Dual Enrollment	Courses taken through a district technical center or college for which high school students earn postsecondary college credit toward a vocational certificate
Postsecondary Adult Vocational (PSAV) Certificate Dual Enrollment	Courses taken through a district technical center or college for which high school students earn postsecondary vocational credit toward a vocational certificate
Postsecondary Career Education– Degree and College Credit	
Associate in Science Degree	A two-year technical degree that prepares students for employment; some associate in science degrees are transferrable toward bachelor's degrees
Associate in Applied Science Degree	A two-year technical degree indicating that a student has trained in a particular field and is prepared for employment; the coursework is more applied than an associate in science degree, and the degree is not intended to transfer to a bachelor's degree program
College Credit Certificate (PSV Certificate)	A short-term college credit career education program that is part of an associate in science or associate in applied science degree, consisting of the technical courses required for these degrees but not the general education courses
Postsecondary Career Education – Vocational Credit	
Applied Technology Diploma	A short-term program that is part of an associate in science or associate in applied science degree that leads to employment in a specific occupation; may provide either vocational credit or college credit
Adult Vocational Certificate	A vocational credit program that trains students in technical skills that enable them to attain and sustain employment and realize economic self-sufficiency. Adult vocational certificate programs do not require students to have high school diplomas to enroll in the program, but students must attain a specified score on a basic skills exam to complete the certificate program.
Apprenticeship	A relatively long (up to five years), highly structured program that provides vocational skill training in a given job through a combination of on-the-job training and classroom instruction
Adult Education	
Adult Basic Education	Basic literacy and life skills training for adults who are performing below the ninth grade level in reading, mathematics, and language arts
Adult High School	Instruction that prepares adult students to successfully complete credits leading to a high school diploma. Coursework is at the high school grade level (9th through 12th grade levels).
Adult High School (Co-enrolled)	Instruction that provides high school students who lack the credits necessary to graduate with their high school cohort class with the opportunity to obtain those credits
General Educational Development	Instruction that prepares students to obtain the necessary skills required to pass the Official GED Test and be awarded a State of Florida High School Diploma; for students who are performing at the ninth grade level or above

---

[4] Section 1011.80(2), *F.S.*

Program Type	Program Description
Adult Education (continued)	
Adult English for Speakers of Other Languages	Instruction in the English language for adults who need to increase their ability to communicate in English for a variety of purposes including employment, education, and life in the United States
Citizenship	Instruction that prepares students for success in the naturalization process required for all who have United States Citizenship as a goal
Applied Academics for Adult Education[1]	Noncredit remedial instruction for students enrolled in Adult Vocational Certificate programs whose results on the Test for Adult Basic Education indicate a need for remediation

1 – Brevard Community College Service Area

Serves: Brevard County
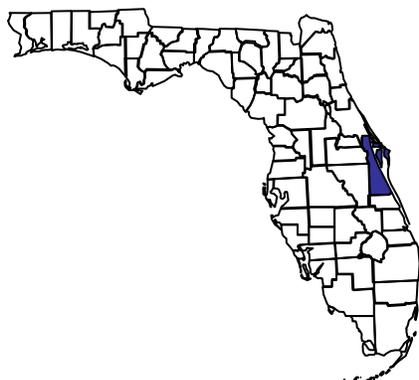

Who provides postsecondary career education programs?

The college is the only public provider of postsecondary career education programs.

Who provides adult education programs?

The school district is the only public provider of adult education programs.

Table 1 shows student enrollments in each type of district and college workforce education program in the 2008-09 school year.

Table 1

[1] Program enrollments may be duplicated, as students may be enrolled in more than one program.

[2] Only school districts provide secondary credit for career and technical programs. Dual enrollment may be done through a college or district technical center; however, these enrollments are only counted once in the district.

[3] By law, school districts cannot offer degree or college credit programs.

Source: Department of Education enrollment data.

Are the college and district duplicating workforce education programs?

There was no duplication of workforce education programs in this college service area during the 2008-09 school year.

What are the largest postsecondary career education programs in this service area?

As shown in Table 2, the Business Administration associate in science degree program had the highest number of students enrolled during the 2008-09 school year.

[3] By law, school districts cannot offer degree or college credit programs.

Source: Department of Education enrollment data.

Are the college and district duplicating workforce education programs?

There is no duplication of adult education programs; however, some duplication in postsecondary career education program offerings exists in this service area. As shown in Table 2, three postsecondary career education programs were offered by both the college and the school district during the 2008-09 school year.

3 – College of Central Florida Service Area

(Formerly Central Florida Community College)

Serves: Citrus, Levy, and Marion counties

Who provides postsecondary career education programs?

The college and the Citrus and Marion county school districts provide postsecondary career education programs.

Who provides adult education programs?

The college and the Citrus and Marion county school districts provide adult education programs.

Table 1 shows student enrollments in each type of district and college workforce education program in the 2008-09 school year.

[1] Program enrollments may be duplicated, as students may be enrolled in more than one program.

[2] Only school districts provide secondary credit for career and technical programs. Dual enrollment may be done through a college or district technical center; however, these enrollments are only counted once in the district.

[3] By law, school districts cannot offer degree or college credit programs.

Source: Department of Education enrollment data.

Are the college and districts duplicating workforce education programs?

There is no duplication of adult education programs; however, some duplication in postsecondary career education program offerings exists at the county level in this service area. As shown in Table 2, two postsecondary career education programs were offered by both the college and Marion County School District at locations within Marion County during the 2008-09 school year.

Table 2

5 – Daytona State College Service Area

Serves: Flagler and Volusia counties

Who provides postsecondary career education programs?
The college and the Flagler County School District provide postsecondary career education programs.

Who provides adult education programs?
The college and the Flagler County School District provide adult education programs.

Table 1 shows student enrollments in each type of district and college workforce education program in the 2008-09 school year.

Table 1

[1] Program enrollments may be duplicated, as students may be enrolled in more than one program.

[2] Only school districts provide secondary credit for career and technical programs. Dual enrollment may be done through a college or district technical center; however, these enrollments are only counted once in the district.

[3] By law, school districts cannot offer degree or college credit programs.

Source: Department of Education enrollment data.

Are the college and districts duplicating workforce education programs?

Both the college and the Flagler County School District provide adult education at locations in the same county, but there was no duplication of postsecondary career education programs at the county level in this college service area during the 2008-09 school year.

What are the largest postsecondary career education programs in this service area?

As shown in Table 2, the Nursing associate in science degree program had the highest number of students enrolled at the college during the 2008-09 school year, while the Early Childhood Education apprenticeship program had the highest enrollment in the Flagler County School District.

Table 2

6 – Edison State College Service Area

Serves: Charlotte, Collier, Glades, Hendry, and Lee counties
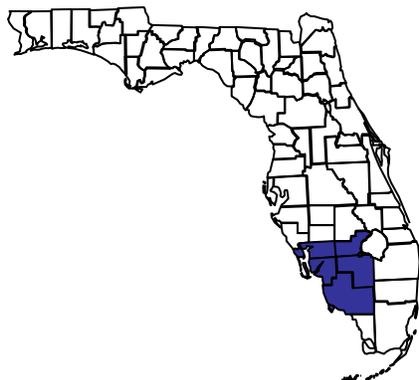

Who provides postsecondary career education programs?

The college and four of the five school districts (Charlotte, Collier, Hendry, and Lee) provide postsecondary career education programs.

Who provides adult education programs?
All five school districts provide adult education programs.

Table 1 shows student enrollments in each type of district and college workforce education program in the 2008-09 school year.

Table 1

[1] Program enrollments may be duplicated, as students may be enrolled in more than one program.

[2] Only school districts provide secondary credit for career and technical programs. Dual enrollment may be done through a college or district technical center; however, these enrollments are only counted once in the district.

[3] By law, school districts cannot offer degree or college credit programs.

[4] The Hendry County School District does not offer any of the postsecondary career education programs we examined; however, the district offers continuing workforce education programs that are funded entirely by student fees.

Source: Department of Education enrollment data.

Are the college and districts duplicating workforce education programs?

There was no duplication of workforce education programs at the county level in this college service area during the 2008-09 school year.

What are the largest postsecondary career education programs in this service area?

As shown in Table 2, the Nursing associate in science degree program had the highest number of students enrolled at the college in the 2008-09 school year, while Home Health Aid had the highest enrollment in the Charlotte County School District, and Practical Nursing had the highest enrollment in the Collier and Lee county school districts.

[1] Program enrollments may be duplicated, as students may be enrolled in more than one program.

[2] Only school districts provide secondary credit for career and technical programs. Dual enrollment may be done through a college or district technical center; however, these enrollments are only counted once in the district.

[3] By law, school districts cannot offer degree or college credit programs.

Source: Department of Education enrollment data.

Are the college and districts duplicating workforce education programs?

There was no duplication of workforce education programs at the county level in this college service area during the 2008-09 school year.

What are the largest postsecondary career education programs in this service area?

As shown in Table 2, the Nursing associate in science degree program had the highest number of students enrolled at the college in the 2008-09 school year, while Practical Nursing had the highest enrollment in the Lake County School District and Nursing Assistant had the highest enrollment in the Sumter County School District.

[1] Program enrollments may be duplicated, as students may be enrolled in more than one program.

[2] Only school districts provide secondary credit for career and technical programs. Dual enrollment may be done through a college or district technical center; however, these enrollments are only counted once in the district.

[3] By law, school districts cannot offer degree or college credit programs.

Source: Department of Education enrollment data.

Are the college and district duplicating workforce education programs?

There was no duplication of workforce education programs at the county level in this college service area during the 2008-09 school year.

What are the largest postsecondary career education programs in this service area?

As shown in Table 2, the Nursing associate in science degree program had the highest number of students enrolled at the college during the 2008-09 school year, while the Practical Nursing vocational certificate program had the highest enrollment in the district.

Total	**0**	**3,381**	**17,930**

[1] Program enrollments may be duplicated, as students may be enrolled in more than one program.

[2] Only school districts provide secondary credit for career and technical programs. Dual enrollment may be done through a college or district technical center; however, these enrollments are only counted once in the district.

[3] By law, school districts cannot offer degree or college credit programs.
